We are subscribers to XM and we are also over the road truck drivers. In our type of job we must know what goes in and around the cities and the local stations do not carry that information. Due to the nature of what we haul and company policy we cannot disclose what we do for our company. XM radio has been very beneficial to our job and should not be terminated due to an organization that cannot adapt or are not willing to adapt to the changes in society and technology. With our job, XM radio offers local traffic reports 24 hrs a day 7 days a week and the local stations that do cover the city report every half hour. We fully support XM Radio and would like to see it continue on and improve its services.
